

- A. Width of openingftinchesmm (brickwork not frame)
- B. Height of openingftinchesmm (from floor to lintel - not frame)
- C. Clear headroom (if any)ftinchesmm
- D. Clear room on left (if any)ftinchesmm
- E. Clear room on right (if any)ftinchesmm

Please complete both imperial and metric measurements.

This will help double check your figures. It is worth taking the time to measure twice to avoid costly mistakes!

IMPORTANT: Check for any obstructions back into the garage i.e. pipes, lights, gas meter, joists, brick pillars.

If there is an obstruction in the garage, at what distance is it from the opening ?

at what height?

if at the side how far does it project?
